## Introduction

Uplink™ is an online application that contains site survey and contact information for all types of facilities, buildings, equipment, assets and personnel. From the convenience of your desktop and at the click of button, you can view an interior virtual tour, photographs, interactive floorplans, inventory, personnel names and contact information, and even hours of operation. It starts with site surveys comprised of CAD space plans and comprehensive photographs of each building. Savonix then transforms the collected information into a portable, secure, and accesible format for quick and easy reference by only your authorized employees.

## Uplink™

*Fast and User-Friendly*

*Accurate and Thorough*

*Securely Accessible*

## Features & Benefits

- Interactive space plans allow you to drill down and quickly access, edit, and update specific information in real-time.
- Complete panoramic photographs and movies, corner perspectives, exteriors, drive-thrus, and entryways give the viewer the most realistic experience, next to being there.
- Catalogue multiple plans for each location: top-down floor plans, elevation-view perspectives, and for buildings with several floors.
